Professional Summary

Passionate Junior Full-Stack Developer experienced in building responsive MERN stack applications. Skilled in React, Node.js, Express.js, Redux Toolkit, and TypeScript. Strong in API integration, clean code, Git, and responsive UI/UX design. Eager to contribute and grow in a fast-paced team.

Technical Skills

- **Frontend:** React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, TypeScript
- **Backend:** Node.js, Express.js, RESTful APIs, TypeScript, PHP
- **Database:** MongoDB, MySQL
- **Tools:** Git, GitHub, Postman, VS Code
- **Other:** Responsive Design, API Integration, JWT Auth, MVC Architecture

Projects

NewsApp – Full-Stack News Portal (<https://news-app-frontend-zeta.vercel.app/>)

Tech: React, Redux Toolkit, Node.js, Express, MongoDB

A full-stack MERN news portal with dynamic routing and content management. Built scalable APIs for fetching, posting, and managing articles, integrated Redux Toolkit for global state management, and implemented a fully responsive UI for seamless use across all devices.

GoGain – Gym Membership Management System

Tech: React, Node.js, Express, MySQL, Tailwind CSS

Developed a full-stack gym management application featuring secure login, trainer listings, and eSewa payment integration. Designed a responsive UI with React and Tailwind CSS, connected to a backend for real-time membership and trainer data, and implemented protected routes, JWT-based authentication, and RESTful APIs.

Experience

Freelance Web Developer (Remote)

- Collaborated with clients worldwide to deliver **customized web solutions**.
- Designed and developed **responsive websites** ensuring **high performance and user satisfaction**.

Client Projects

- Developed an **inventory management system** for a small business.
- Designed an **interactive website** for a local event organizer.
